# **Yiming Cheng**

+1 7736907675 |eaminc0328@gmail.com |Chicago,Illinois

#### **EDUCATION**

Tsinghua University Department of Electronic Engineering

Sep.2019-Jul.2024

Bachelor of Engineering in Electronic Engineering(Major)

Minor in Statistics, Minor in Laws

University of Chicago Department of Computer Science

Expected:Jan.2026

Master in Computer Science(Pre-doc)

• GPA: 3.95/4.0

# **PUBLICATIONS**

- Yi Yang, Yiming Cheng, Hao Feng, Zhu Han "Emotion-Aware Scene Adaptation: A Bandwidth-Efficient Approach for Generating Animated Short", MDPI-sensors 2024
- > X Lan, Y Cheng, L Sheng, C Gao, Y Li "Depression detection on social media with large language models", arXiv preprint arXiv:2403.10750
- Lan, x, Piao, ..., Cheng, Y, Gao, c, Li, Y, Niu, Y, Song, Y, Gai, K, & Li, Y(2024). Recommendation for Inclusivity of Underrepresented Producers in Usergenerated Content Platforms. In recycle
- Yi Yang, Hao Feng, Yiming Cheng, Yitong Ma, Zhu Han, "Minimizing Hallucinations and Communication Cost: Adversarial Debate and Voting Mechanisms in LLM-Based Multi-Agents," MDPI Applied Science 2025
- ➤ **Yiming Cheng**, "Research on Recommendation System Technology Based on Large Language Models," Graduation Design, Tsinghua University, 2024.
- Patent: Yi Yang, Yiming Cheng, Hao Feng, et al. "A Semantic Encoding and Decoding Framework for Converting Visual Content into Virtual Animated Visual Representations."

#### RESEARCH & PROJECT EXPERIENCES

Lmcache Team
Open Source Contributor

Sep.2024-present

Advisor: Prof. Junchen Jiang

Working on open-source project:

- ➤ LMCache: The first open-source Knowledge Delivery Network (KDN) that accelerates LLMapplications up to 8x faster, at 8x lower cost.
- ➤ VLLM/production stack: Scale from single vLLM instance to distributed vLLM deployment withoutchanging any application code.Now an official project under vLLM.
- Matain and contribute to Open-Source repo. Working on Router Scheduling and cloud deployment. Contributed 1262 lines of code.

# Future Intelligent Lab(FIBLAB), Tsinghua University Research Assistant

Jul.2022—Jun.2024

Advisor: Prof. Yong Li

#### Recommendation for Inclusivity of Underrepresented Producers in User-generated Content Platform

- Take the pioneering step to thinking of the inclusivity issue of underrepresented producers in UGC(user-generated content) platform.
- Propose to construct a heterogeneous graph that can enrich the relations of vulnerable populations, and further propose graph neural networks to learn representations based on enriching features from multi-hop neighbors.

#### City Socioeconomic Simulator based on Large Language Models

- Use UE to Build a visual model scene of Beijing (CBD district)
- Use python to write scripts for agents to interface with LLM and design the agents' memory mechanism to do POI recommendation. (POI means point of interest in the city)
- Design and plug in agent-based recommendation systems

#### Signal Processing Lab, Tsinghua University Research Assistant

Emotion-Aware Scene Adaptation: A Bandwidth-Efficient Approach for Generating Animated Shorts

- ➤ Use the PyTorch framework, build an image element and emotion recognition model based on the CLIP model and InceptionV3, and use PAD (Pleasure-Arousal-Dominance) for emotion scoring.
- Enhance the generated semantics using the EmoCap model trained based on PAD scores for emotion style, ultimately achieving higher emotional coherence than the baseline on the received new video frames.

# Wireless Networking, Signal Processing and Security Lab, University of Houston April. 2022—present Research Assistant Advisor: Prof. ZhuHan, Member of NAS

Scalable AI Generative Content for Vehicular Network Semantic Communication

- > This project aims to establish a large-model-based semantic communication channel and test its accuracy on a vehicular dataset
- Build and test a channel in PyTorch that uses CLIP to convert original images into semantics and then uses Stable Diffusion to restore semantics back into images.

# **Internship PROJECTS**

## Beijing SmartBow Information Technology Co., Ltd. (Company) Software Engineer

June.2023—Sep.2023

Mar.2022—present

Advisor: Aso Prof. Yi Yang

- Refactor the Sunflower library(he main functions include JSON parsing, MQTT, B-Stack device information parsing, and data transmission encryption) for the company's Internet of Things (IoT) data platform using Go-lang
- Perform functional and performance testing on the refactored Sunflower library.
- Collaborate with hardware interns to debug and ensure successful MQTT-based data transfer of bridge deflection, vibration frequency, and temperature data from LuZhou Bridge to the company's database.

#### Beijing Thunisoft Information Technology Co., Ltd.

**Software Engineer** 

July.2022—Sep.2022

- Use Spring Batch to develop a batch job scheduling system supporting complex workflows and dependency management. Scheduled tasks are executed as planned using Cron expression triggers.
- Integrate Quartz scheduler for enhanced flexibility.
- > Data integrity and stability are assured with Spring transaction management and JDBC operations.

# **OTHERS**

Scholarship: Merit-based Predoc Scholarship of \$40,000 ,University of Chicago

Field:

Previously as undergraduate: Data mining (Recommendation System, Emotion Awareness, Embodied City)

Current and future: System for machine learning (distributed LLM deployment, distributed KV cache, efficient ml)

Machine learning for systems(machine learning for code generation)

**Programming Skills:** Python(Pytorch, CuPy), Go(Docker, K8s), Git(Github action), Linux, C, C++, Matlab, Verilog etc.

Personal Website: https://eaminc.github.io/ includes github.google scholar and other detailed infomation
